

Gaithersburg Glass Company

Insulated Glass (I.G.) Window Unit

Insulated glass installed by Gaithersburg Glass Company is warranted by the manufacturer to be free from defects under normal use and service against condensation build up between the glass resulting from failure of the hermetic seal for a period of five (5) years from date of installation.

Gaithersburg Glass Company (GGC) will replace the faulty I.G. unit in the first (1) year at no charge for both materials and labor (if originally installed by GGC). For years two (2) thru the end of this warranty, materials will be covered by this warranty, labor for will be charged at regular rates.

Condensation on the interior of the window in cold climates and on the exterior of the window in warm climates is a natural result of humidity and temperatures and is not covered by this warranty. This warranty does not apply to units installed in unheated or non-enclosed areas or on ships, aircraft, vehicles, pools, solar collectors or commercial refrigeration nor to units installed in a sloped position. Use of power washers will void this warranty. The use of thermal window drapes, window tinting and/or overlays may cause excessive heat build up in the unit and voids this warranty.

This warranty is in lieu of all other warranties, either express or implied. Neither the manufacturer nor GGC is responsible for any incidental or consequential damages resulting from any defects in any I.G. unit.
